It gives me immense pleasure to bring to your kind notice that Tagore Hospital & Research Institute has become a centre for providing excellent quality health services at the most affordable prices to the people of Rajasthan. I would like to share a few salient features of this hospital as detailed below.

We have worked hard to reach the International Standards of Quality in Laboratory Diagnostics (NABL). We spend a lot of resources on running Quality Controls with patient samples to give accurate and precise results which will help the specialists to know the exact status of health of each person.

Our hospital on the basis of its excellent performance gives outstanding results and swift patient recovery in various departments like Orthopedic, Gynae, Pediatric, General Surgery, ENT, Ophthalmology, Dental, Physiotherapy & Yoga, Urology and Plastic Surgery etc.

We have recently upgraded our Emergency ward to provide the latest Trauma services, having the most modern equipments, trained and dedicated staff.

The hospital is authorized by the Government of Rajasthan for handling BHAMASHAH cases under supervision of qualified doctors.

• Laboratory investigations help doctor to arrive at correct diagnosis & follow-up of patients. This is just a professional opinion, not a final diagnosis.
• Individual laboratory investigations are never conclusive but should be used along with other relevant clinical examination to achieve final diagnosis.
• Test parameters marked by an asterisk (*) are excluded from the scope of NABL accredited tests.
